

## SHORT-TERM SOLUTION

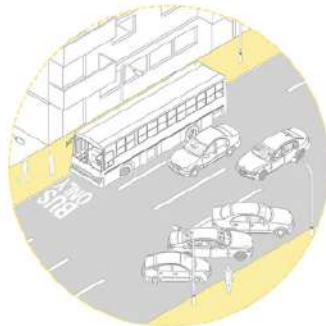

### Zoning the district

Dividing the district into zones where their borders are a 15-20 min. walk away from the center

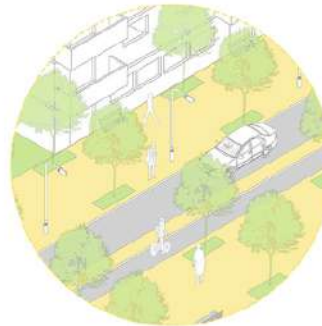

### The safe zone

Each zone would be bordered by type "A" streets, while the center is for types "B" and "C." The zone should have all the necessary services, to maintain a successful lockdown (when needed) as the residents won't need to leave their zone.

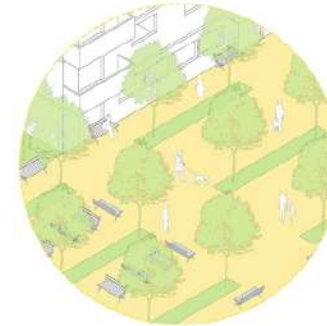

### Type "A" streets

Only for movement of vehicles and parking spaces

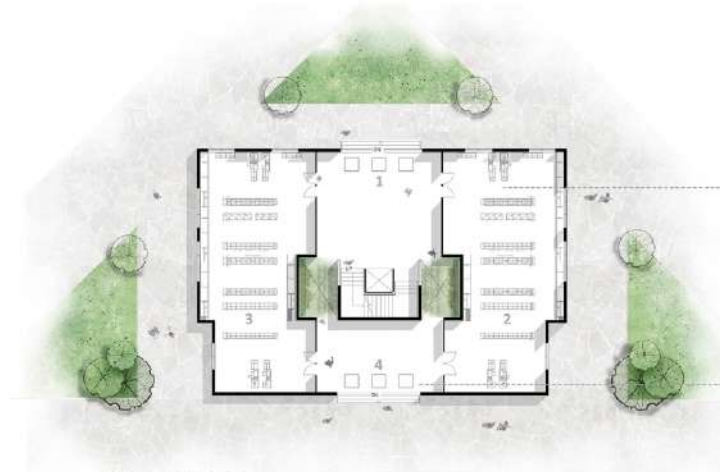

### Type "B" streets

Shared space between cars, pedestrians, and bikes

### Type "C" streets

Public spaces for pedestrians only

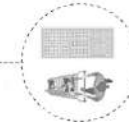

### GROUND FLOOR

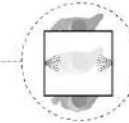

building services and interior gardens

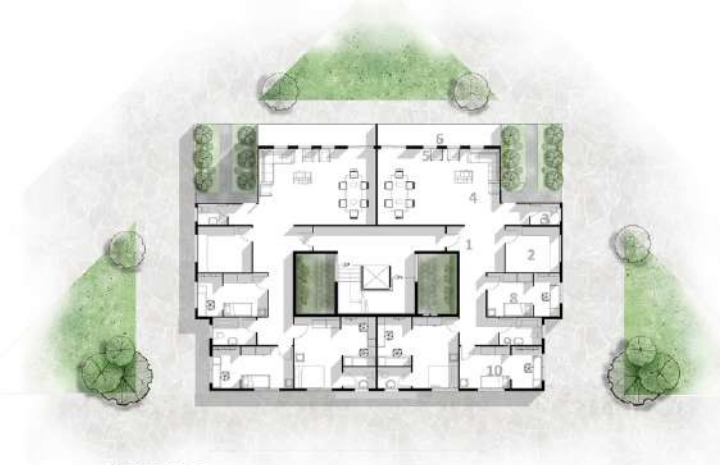

- 1.main entrance
- 2.service 1
- 3.service 2
- 4.rear entrance

Each service would be designed to allow physical distancing

Each entrance would have a sanitaton gate

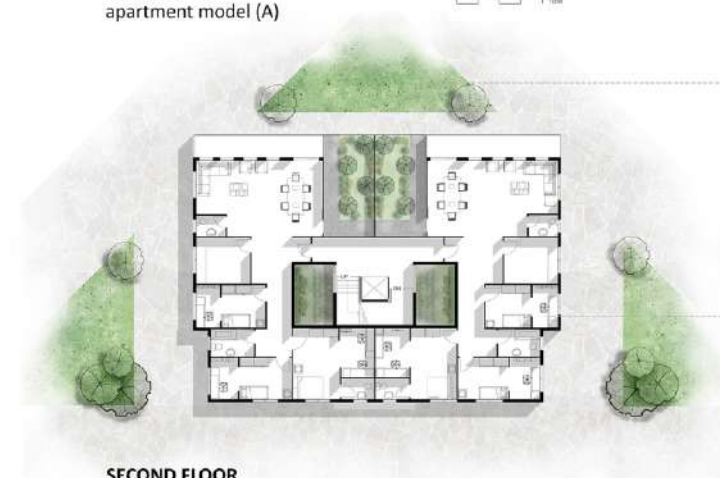

### FIRST FLOOR

apartment model (A)

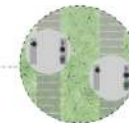

- 1.entrance
- 2.kitchen
- 3.toilet
- 4.living room
- 5.dining room
- 6.terrace
- 7.mini-garden
- 8.bedroom (1)
- 9.bathroom
- 10.bedroom (2)
- 11.master bedroom

### SECOND FLOOR

apartment model (B)

A public space that allows physical distancing among the residents

Section of the room is to serve as a private office and working space
